

SMART LEARNING WITH AI NOTES SUMMARIZER

A Project Report

In Partial Fulfillment of the Requirements

for the Degree of

Bachelor of Technology

In

COMPUTER SCIENCE & ENGINEERING

by

GAURAV

(Roll No. 2203840100025)

UNDER THE SUPERVISION OF

BHARTI KUMARI MA'AM

SHIV GOVIND SIR

SHEAT COLLEGE OF ENGINEERING, VARANASI

to the

Faculty of Computer Science & Engineering

DR. APJ ABDUL KALAM TECHNICAL UNIVERSITY

LUCKNOW

(Formerly Uttar Pradesh Technical University, Lucknow)

May 2026

DECLARATION

I hereby declare that the work presented in this report entitled “**Smart Learning with AI Notes Summarizer**” was carried out by me. I have not submitted the matter embodied in this report for the award of any other degree from any other University or Institute.

I have given due credit to the original authors/sources for all the words, ideas, diagrams, graphics, computer programs, experiments, and results that are not my original contribution. Using quotation marks to identify verbatim sentences, I credited the original authors/sources.

I affirm that no portion of my work is plagiarized, and the experiments and results reported in the report are not manipulated. I shall be fully responsible and answerable if a complaint of plagiarism and conducting the experiments and results.

Name: **Gaurav**

Roll. No: **2203840100025**

(Candidate Signature)

CERTIFICATE

Certified that **Gaurav**(*Roll no. : 2203840100025*)has carried out the research work presented in this thesis entitled “**Smart Learning with AI Notes Summarizer**” for the award of Bachelor of Technology from Dr A. P. J. Abdul Kalam Technical University, Lucknow, under my supervision The thesis embodies results of original work. Studies are carried out by the student himself/herself (print only that is applicable), and the contents of the thesis do not form the basis for the award of any other degree to the candidate or anybody else from this or any other University/Institution.

Date:

HOD SIGNATURE

(Signature of Supervisor)

Bharti Kumari and Shiv Govind

Assistant Professor, Dept. of Computer Science & Engineering

SHEAT College Of Engineering, Varanasi

ABSTRACT

ACKNOWLEDGMENTS

I wish to express my heartfelt thanks to my supervisor, Bharti Kumari Ma'm and Shiv Govind Sir. (Assistant Professor) in the Department of Computer Science and Engineering. Their continuous involvement, tireless energy, and skilful mentorship truly shaped this research and gave it a focus. I honestly do not know how I would have completed this thesis without their wise advice and constant encouragement.

Im also very grateful to the entire faculty of the Computer Science and Engineering department, especially for the stimulating intellectual environment and support during my research endeavors.

To my friends, thank you for your invaluable support and for always being there. I also want to acknowledge everyone who assisted me in any capacity during this thesis project. Lastly, and most importantly, my deepest gratitude goes to my parents. Their moral support and unwavering belief in me were foundational to successfully finishing this thesis. And finally, I thank Almighty God.

LIST OF ABBREVIATIONS

- AI – Artificial Intelligence
- NLP – Natural Language Processing
- API – Application Programming Interface

CHAPTER – 1

INTRODUCTION

In the modern digital era, the volume of textual information has increased significantly. Students and professionals are often required to read and analyze large amounts of text, which can be time-consuming and inefficient.

The AI Notes Summarizer addresses this issue by providing an automated solution that converts lengthy text into concise summaries using advanced Natural Language Processing techniques.

CHAPTER – 2

LITERATURE REVIEW

Various approaches to text summarization have been developed, primarily categorized into extractive and abstractive methods.

- **Extractive Summarization:** Selects important sentences directly from the original text.
- **Abstractive Summarization:** Generates new sentences that capture the meaning of the original text.

Recent advancements in transformer-based models have significantly improved the performance and accuracy of text summarization systems.

CHAPTER – 3

RESEARCH METHODOLOGY

System Workflow

1. The user provides input text.
2. The system preprocesses the text.
3. The NLP model processes the input.
4. A summary is generated.
5. The summarized output is displayed to the user.

Technologies Used

- Frontend: HTML, CSS, JavaScript
- Backend: Python (Flask)
- NLP Libraries: NLTK / Transformers
- Version Control: GitHub

CHAPTERS – 4

<RESULT AND DISCUSSION >

The system effectively summarizes long textual content into concise and meaningful outputs.

The results demonstrate that the application performs efficiently and produces readable summaries.

Observations

- High accuracy for short and medium-length text
- Minor variations in very long or complex text
- Fast processing and user-friendly interface

CONCLUSION AND FUTURE WORK

The AI Notes Summarizer is a practical and efficient application that enhances productivity by automating the process of text summarization.

Future Scope

- Support for multiple languages

- Integration of voice input features
- Ability to summarize PDF and document files
- Implementation of more advanced AI models
